| Error When Creating Feature Exceptions (i.e. whitelisting).....         | 6        |

## GENERAL ENHANCEMENTS

---

### Confirmation Modal Added for Exclusive SAML SSO Dashboard Auth

A new confirmation modal has been added which confirms that a user wants to switch to exclusively using SAML SSO authentication for access to the Machina Platform. If cancelled through the modal popup, the checkbox will remain unchecked.

### New Billing User Scope Created

A new user scope has been created for billing along with the Billing Manager user role which allows users to access the Billing tab on the Settings page of the Machina Console. The Billing Manager role can be assigned via a Tenant Manager or assumed during the self-service portal sign-up.

### Billing Manager

**NAME:** billing\_manager

**DISPLAY NAME:** Billing Manager

**DESCRIPTION:** Dashboard management of billing information within a tenant or organization

### Billing Tab Added to Machina Console

A Billing tab has been added to the Machina Console on under the Settings tab which allows users to manage billing settings for the Console. Access to the tab is gated by the new Billing User scope which can be assigned to users by a Machina Console admin.

Identity Management      Access Security      **Billing**

*Account*

---

**Account Standing:**      Good

## Upgrade Button Displayed In Console

When using the Pro version of the Machina Console, an upgrade button will be displayed at the top of the page to prompt admin users to upgrade for unlimited billing transactions.

Upgrade your account for unlimited usage!

## Status Displays in Machina Billing Section Based on User Standing

Billing status will now be displayed in the Billing section of Machina Console. This displays relevant Billing information for the Machina user including: a notification when a saved credit card has expired, a notification when users have exceeded their transaction limit for the Pro tier, and a notification when bad credit card information has been entered.

## Billing Logging

The new Machina Billing system includes logging information to reflect Billing Admin actions such as adding credit cards, removing credit cards, etc.

## External ID Parameter Enhancement

Customers can now the quantity variable in order to set the number of External\_IDs that a request can make. The default setting is 1000 per fetch call. This will fetch the latest External\_IDs first.

## DEFECTS ADDRESSED

---

## Enrollment Request Failed, Creating Duplicate Profiles

In certain customer environments, it has been reported that duplicate profiles were erroneously created. This resulted in additional errors being associated with the affected profiles. This issue has been identified and addressed with this release.

## Error When Creating Feature Exceptions (i.e. whitelisting)

When attempting to whitelist in certain customer environments, it has been reported that Machina returns a 400 Error from the Machina API. This issue has been identified and addressed with this release.
